#### Characteristics

Water-based coating made with two component polyurethane-type resins with excellent adhesion on concrete and metals. It is a product that provides a shiny, hard topcoat with high chemical resistance to detergents and sanitizers resistant to bacterial growth and with anti-graffiti properties.

AQUACOAT U 2K has the great advantage of being a totally environmentally friendly product since it does not contain solvents in its formulation. It has a low VOC and allows its application in closed áreas without problems derived from the dangerous concentration of solvents.

# Uses

This coating is recommended to be used as a topcoat or maintenance on walls, floors and ceilings. In the food, pharmaceutical, hospitals and bottling industries. As well as in tanks, pipes and metal structures where the use of solvents is restricted.

## **Systems**

| System | Description                      |
|--------|----------------------------------|
| 1      | AQUACOAT E AP + AQUACOAT U 2K    |
| 2      | GALVANOX VI AQUA + AQUACOAT U 2K |

## **Surface Preparation**

The substrate on which it is going to be applied must be completely clean and dry, free of dust, grease and/or oil. The presence of any of the mentioned contaminants may cause poor adhesion of the coating. The product should not be applied under any circumstances when the surface temperature is greater tan 50°C (122°F).

## **Application**

For spraying application should be done at 30 cm distance from substrate to obtain specified film thickness. The application should be done in open and ventilated spaces. The coating should not be apply when the environment temperature is inferior to 277 K ( $4^{\circ}$ C) ( $39.2^{\circ}$ F) or superior to 316 K ( $43^{\circ}$ C) ( $109.4^{\circ}$ F). Apply at relative humidity less than 85%.

## **Colors**

White. Others, consult tehcnical area.

| CHEMICAL RESISTANCE |                  | TESTING METHOD      |                |  |
|---------------------|------------------|---------------------|----------------|--|
| Chemical Agent      | Fumes and Vapors | Spills and Splashes | TESTING METHOD |  |
| Acids               | Excellent        | Okay                | ASTM G-20      |  |
| Alkalis             | Excellent        | Okay                | ASTM G-20      |  |
| Solvents            | Okay             | Occasional Contact  | ASTM G-20      |  |
| Salts               | Excellent        | Excellent           | ASTM G-20      |  |
| Water               | Excellent        | Excellent           | ASTM G-20      |  |

| (2) Use 3/8-inch inner diameter hose (I.D.) |        |     |

# **Brush Application**

**Brush (only for minor touch-ups)** 

## **Roller Application**

#### Rodillo

# Mix Ratio According to Equipment Used

| Equipment                              | Solvent  |
|--|--|
| Airless spray                          | Use 5 - 10% of water.  |
| Conventional Spraying Equipment        | Use 15 - 20% of water.   |
| Brush or Roller Application            | Use maximum of 20% of water.   |
| * For the calculation of materials con | sider 10-20% shrinkage depending on the state of the surface and the application conditions. |

# **Storage Conditions**

Closed lid containers, under roof and a temperature no more than  $40^{\circ}$ C ( $104^{\circ}$ F) and no more than 80% relative humidity.

# **Driving Safety**

Its application must be in well-ventilated places. When applying consult and follow the safety regulations indicated in the product's safety sheet.

Revision (May - 2018) Page 3 of 4

<sup>\*</sup>To clean the used application equipment use water. If the product is already dry use acetone.
