#### **Characteristics**

Coating made from modified resins with a large amount of chemically active pigment and highly durable corrosion inhibitor.

The vehicle penetrates the pores carrying the inhibitor pigment inside them helping to eliminate corrosion. On the other hand the synthetic resin molecules tend to remain on the surface preventing corrosion from occuring on the treated surface. Due to its high oil content the coating has a relatively slow drying time to allow maximum wetting of the substrate.

SUOX 19 self-priming provides excellent resistance to industrial vapors, excellent protection to structural steel edges, abrasion resistance and a long life.

#### Uses

This coating is recommended to be applied on transformers, electrical equipment, gas pipes machinery, motors, tubes, public lighting, tanks and vessels, etc.

### **Systems**

System	Description
1	SUBOX 19 + SUBALOX A
2	SUBOX 19 + SUBALOX A SR
3	SUBOX 19 + SUBALOX AC

# **Surface Preparation**

The surface on which it is to be applied does not require a high degree of cleaning. Only a preparation is enough such as cleaning with a wire brush thus removing badly adhered paint and rust as well as dust.

### **Application**

For spraying application should be done at 30 cm distance from substrate to obtain specified film thickness. The application should be done in open and ventilated spaces. The coating should not be apply when the environment temperature is inferior to 4°C (39.2°F) or superior to 43°C (109.4°F). Apply at a 85% relative humidity.

### **Colors**

Light green.

<sup>\*</sup> To clean application equipment, use dilution solvent MT-530.

### Mix Ratio According to Equipment Used

Equipment	Solvent					
Airless spray	It does not carry or if necessary maximum 10% of MT-530 thinner.					
Conventional Spraying Equipment	Use 20 - 30% of MT-530 thinner.					
Brush or Roller Application	Use maximum of 10% of MT-530 thinner.					
*To calculate material consider a 10-20% tare depending on surface and application conditions.						

### **Storage Conditions**

Closed lid containers, under roof and a temperature no more than  $40^{\circ}$ C ( $104^{\circ}$ F) and no more than 80 % relative humidity.

### **Driving Safety**

This product contains highly flammable materials, it's vapors are toxic, avoid skin contact, eyes (splashes) or continuous inhalation, use in well ventilated areas, away from fires. When use consult and follow safety rules indicated in the safety data sheet for this product.
